

NAYANENDHU C U

Data Analyst | Data Science

Bangalore • +91-7594801686 • nayanendhucu@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL, Advanced Excel, Power BI, and Python across operational, retail, sales, and product analytics use cases. Skilled in data cleaning, exploratory data analysis (EDA), KPI analysis, dashboard design, and classification modeling. Strong analytical thinking, attention to detail, and communication skills, with a proven ability to translate raw data into clear, decision-ready insights for stakeholders.

TECHNICAL SKILLS

SQL & Databases: Analytical queries, joins, aggregations, MySQL

Advanced Excel: Pivot Tables, VLOOKUP/HLOOKUP/XLOOKUP, conditional formatting, dashboard reporting, data validation

Power BI: Dashboard design, DAX measures, data modeling, sales/KPI reporting

Python for Analytics: Pandas, NumPy, EDA, KPI analysis, Matplotlib, Scikit-learn

Data Concepts: Data Cleaning, Stakeholder Reporting, RFM Analysis, Classification Modeling, Data Visualization

Web Development: HTML, CSS, JavaScript, PHP, Django

CORE & SOFT SKILLS

Analytical Thinking • Problem-Solving • Attention to Detail • Critical Thinking • Communication & Stakeholder Management • Data Storytelling • Presentation Skills • Time Management • Team Collaboration • Adaptability • Decision-Making Support • Business Acumen

INTERNSHIP EXPERIENCE

Data Science Intern — OCIUZ Technologies

Feb 2026 – Mar 2026

MG Road, Thrissur | 1-month internship

- Worked across the full data analysis workflow — preprocessing, EDA, model building, and evaluation — applied to real-world business and healthcare datasets.
- Used Python (Pandas, NumPy, Matplotlib) to clean, visualize, and build classification models across six applied projects, including heart disease, plant disease, and pothole detection.

Data Analytics Intern — Placement Mantra

6-Month Internship

Retail Management System Project

- Built a Retail Management System project applying SQL, Excel, and Python for data extraction, cleaning, and analysis of sales, inventory, and stock-level data.
- Analyzed sales and inventory trends to generate reports and dashboards, supporting data-driven retail operational decisions.

KEY PROJECTS

Retail Sales Dashboard

Power BI, DAX, Excel

- Built an interactive Power BI dashboard tracking sales and revenue KPIs across regions and product categories using DAX measures and data modeling.

Customer Recommendation System

Python, SQL, ML

- Segmented 50,000 transactions using RFM analysis and built a CatBoost classification model (80% accuracy) to support a targeted recommendation strategy.

Market Sentiment vs Trading Performance

Python, Pandas, Matplotlib

- Performed EDA on 200,000+ trading records merged with Fear & Greed Index data, visualizing key performance metrics grouped by market sentiment.

Shruti — Artist Booking Platform (Analytics)

SQL, Python, Django, MySQL

- Analyzed booking and user activity data for an artist booking platform, querying MySQL data to surface booking trends and engagement patterns.

EDUCATION

Bachelor of Computer Application — Krupanidhi Degree College, Bangalore

Completed June 2026

Kerala State Syllabus — NHSS Mundathikode, Kerala

March 2023
